

org.jgap.impl.SwappingMutation  
OperatorTest.testOperate\_4

```
graph LR; A[org.jgap.impl.SwappingMutationOperatorTest.testOperate_4] --> B[org.jgap.JGAPTestCase.assertEquals]; A --> C[org.jgap.impl.SwappingMutationOperatorTest.checksum];
```

The diagram illustrates a call from a test method to two different assertion methods. A grey box on the left represents the source method, and two white boxes on the right represent the target methods. Blue arrows indicate the direction of the call.

org.jgap.JGAPTestCase.assert  
Equals

org.jgap.impl.SwappingMutation  
OperatorTest.checksum
