

org.jgap.impl.IntegerGene
Test.testIntegerGeneSupportsFull
IntegerRange

```
graph LR; A["org.jgap.impl.IntegerGene  
Test.testIntegerGeneSupportsFull  
IntegerRange"] --> B["org.jgap.JGAPTestCase.assertEquals"]; A --> C["org.jgap.Gene.getAllele"]
```

The diagram illustrates a call from the `org.jgap.impl.IntegerGeneTest.testIntegerGeneSupportsFullIntegerRange` method to two other methods: `org.jgap.JGAPTestCase.assertEquals` and `org.jgap.Gene.getAllele`. The source method is highlighted in a grey box, while the target methods are in white boxes. Blue arrows indicate the direction of the calls.

org.jgap.JGAPTestCase.assertEquals

org.jgap.Gene.getAllele
