

org.jgap.PopulationTest.test
GetChromosome_0

```
graph LR; A[org.jgap.PopulationTest.test  
GetChromosome_0] --> B[org.jgap.JGAPTestCase.assert  
Equals]; A --> C[org.jgap.Population.getChromosome];
```

The diagram illustrates a sequence of method calls. A central box on the left, representing the test method `org.jgap.PopulationTest.testGetChromosome_0`, has two outgoing arrows. The top arrow points to a box representing the assertion method `org.jgap.JGAPTestCase.assertEquals`. The bottom arrow points to a box representing the population method `org.jgap.Population.getChromosome`.

org.jgap.JGAPTestCase.assert
Equals

org.jgap.Population.getChromosome
