

org.jgap.distr.grid.common.
BasicContext.BasicContext

```
graph LR; A[org.jgap.distr.grid.common.  
BasicContext.BasicContext] --> B[org.jgap.distr.grid.common.  
BasicContext.setApplId]; A --> C[org.jgap.distr.grid.common.  
BasicContext.setContextId];
```

The diagram illustrates a class hierarchy or association. A central box on the left, labeled 'org.jgap.distr.grid.common.BasicContext.BasicContext', has two arrows pointing to two boxes on the right. The top box is labeled 'org.jgap.distr.grid.common.BasicContext.setApplId' and the bottom box is labeled 'org.jgap.distr.grid.common.BasicContext.setContextId'.
