

org.jgap.data.DataElements  
DocumentTest.testAppendChild\_0

```
graph LR; A["org.jgap.data.DataElements  
DocumentTest.testAppendChild_0"] --> B["org.jgap.JGAPTestCase.assertEquals"]; A --> C["org.jgap.data.DataElements  
Document.getTree"]
```

The diagram illustrates a call to the `assertEquals` method. A source box on the left, representing the test method `DocumentTest.testAppendChild_0`, has two arrows pointing to target boxes on the right. The top target box represents the `assertEquals` method from `org.jgap.JGAPTestCase`, and the bottom target box represents the `getTree` method from `org.jgap.data.DataElements.Document`.

org.jgap.JGAPTestCase.assertEquals
